SINGLETRAILER

EN

FOR SMALL AND TALL

The Singletrailer is the ideal trailer for cyclists who want to enjoy mountains and trails together with their families. The Singletrailer opens up the possibility of real mountain bike rides with your child, even through the roughest terrain. Your child sits comfortably in a cushioned, suspended cabin on a chassis made from extra-light yet extremely durable CrMo steel with a roll bar. The seatbelt is a five-point harness design which provides extra security. The Singletrailer is just 45 cm wide making it narrower than your mountain bike, weighs only 9.5 kg, and is compatible with 29" wheels.

For children ages 3-12 months we offer an optional baby support by Weber.

At about five years or at 25 kg, your child can progress to the Streamliner where they can pedal for themselves! Contact us or visit us at

www.en.tout-terrain.de.

HIGHLIGHTS

- Extremely low rolling resistance due to single-wheel design
- Very little lateral force acts on the passenger thanks to Tilt Technology
- Three different integrated closures are constructed from high-quality Cordura
- The comfortable seat is made of breathable fabric and filled with PU foam to help regulate your child's body temperature
- Integrated bash guard protects from ground impacts

NEW FEATURES

New matt cross-link coupler finish for a better connection between the hitch and coupler

Additional snap buttons permit attaching the closures at half height to increase ventilation options

Reflective logos on the side and back increase visibility

Slot in the Curdura cover for mounting the adjustable Weber baby supporter

New Suntour shock for improved suspension dynamics

Three-point magnetic Belt seatbelt buckle from Fidlock for easy operation

New rear hub, black rim and ImpacTrailpac tire for better comfort, grip and style
