EN

## FOR SMALL AND TALL

The Singletrailer is the ideal trailer for all bikers who want to enjoy the mountains together with their families. With the Singletrailer real mountain bike tours are possible, even across the roughest terrain: The child sits, gently sprung and cushioned, in a chassis produced from extra-light but highly durable CrMo steel with a roll bar. The five-point seat belt ensures additional safety. The Singletrailer is just 45 cm wide – and therefore narrower than your mountain bike, weighs only 9.5 kg and is compatible with 29" wheels. For children between 3-12 months we offer a matching baby seat by Weber as accessory. At about six years or 25 kg body weight the children should pedal themselves – ideally on our proven Streamliner! Contact us or visit us at [www.en.tout-terrain.de](http://www.en.tout-terrain.de).

# FEATURES

Stable and crash-proof frame with roll bar from CrMo tube

Three different cover options from high quality Cordura

Maximum maneuverability through CNC-manufactured and ball-bearing joint

Five-point safety belt with padding

High quality, comfortable seat from robust Cordura filled with PU foam prevents child from becoming chilly or overheated

Spring travel 160 or 200 mm (adjustable)

Extremely low rolling resistance due to single tracked design

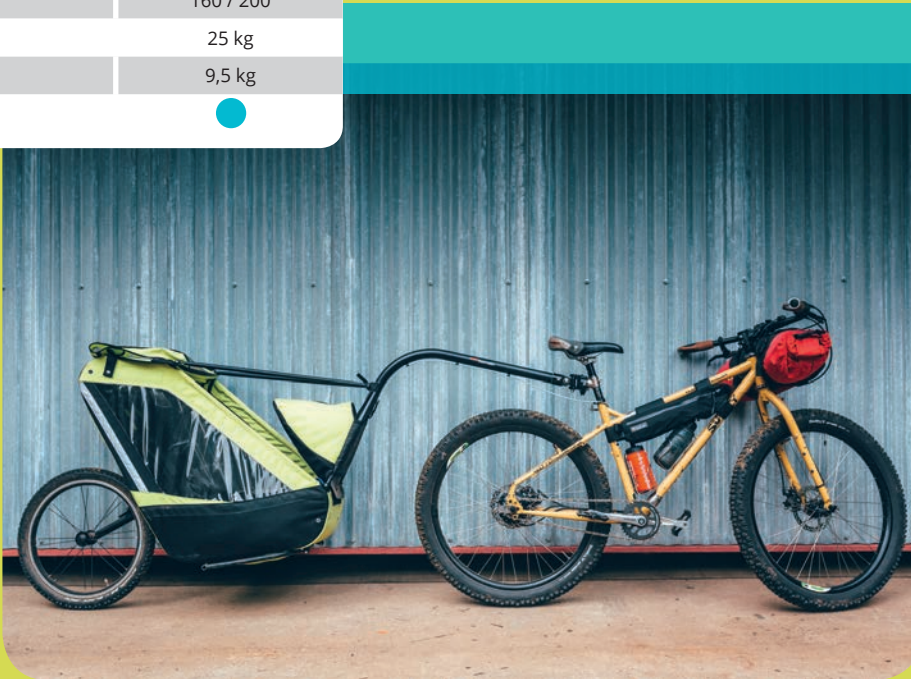

Hardly any lateral forces in curves thanks to curve tilt

## AT A GLANCE
